- ReactJs
- Html-CSS

ADDITIONAL INFORMATION

Interns

20/06/2022 – 08/08/2022

Başarsoft Bilgi Teknolojileri

During my internship, I had the chance to learn countless technologies. For example, the usage areas of technologies developed by Başarsoft are as follows: GIS, MapInfo. Things I learned: UI / UX Design, Authentication on Google Firebase.

Projects

01/02/2022 – 14/07/2022

Teknofest TEPEGÖZ The main idea of the content is the development and production of artificial intelligence technologies is the future of our country. We detect vehicle and human objects using the camera data of the flying car. We are using software to detect pedestrian,car,bus and another objects with YOLOv5.We are planning to scan objects with high rate.

01/09/2022 – 05/02/2023

ADHD(Attention Deficit Hyperactive Disorder) Detection on Expert System We planned to include an information page, expert recommendation feature, take precautions page, preventive games page, informative articles about ADHD and an information page with expert opinions.. This way the application can also be a minor treatment before they go to a doctor for their condition. We are going to use pyke library on Python to configuring the database. We did application on android using java language.

21/06/2022 – 08/08/2022

Fitness App Application This application is a mobile running application. This is tracking and saving your activities and calculating the calori to your activities.
